XPLG V7 Documentation

About XPLG

XPLG is a platform for management, analysis and monitoring of any machine generated data - Powerful search, analysis and real time visualizations of any log data.

XPLG makes it extremely easy to store, analyze and monitor any log data from your IT systems and technology infrastructure. Troubleshoot problems in minutes and Monitor your entire environment to avoid outages or service level issue. Gain real-time visibility and critical insights into customer experience, transactions and behavior. XPLG will make all your logs data accessible, usable and valuable.
