

Getting Started

In order to begin working with XpoLog, the Administrator has to do the following:

1. Plan the XpoLog installation (see [System Requirements](#)).
2. Install XpoLog (see [Installation](#)).
3. Perform post installation recommendations (see [Post Installation Recommendations](#)).
4. Add data to the system (see [Adding Data to the XpoLog Platform](#)).
5. Set up important settings (see [System & Settings](#)).
