

# Adding an Events Gadget

Displays a search result events showing log events matching a given Search query; gadget has a [View in Search](#) link that can be clicked to navigate to the Search search engine to perform a drill-down.

## To add an Events Gadget:

1. In **Title**, type a name for the gadget.
2. In **Search Query**, type the search query to run, based on the Search [simple/complex](#) syntax.
3. In **Display Columns**, type the names of the columns to be displayed separated by commas, or leave blank to display all columns.
4. In **Time Range**, select the time frame following which the gadget display is to be refreshed.
5. In **Max Number of Events**, select the maximum number of events to be returned.
6. Click the **Save** button.  
The gadget is saved in the dashboard.

## Result Example:

The screenshot shows a dashboard gadget titled "Search Result Events Chart". It includes a refresh icon, a title, and a timestamp "Last 7 Days | Last Refreshed: 06/02/2015 17:51". The main content is a list of log events, each with a timestamp and a detailed log line. To the right of the list is a vertical scrollbar and a set of pagination buttons (1-10). At the bottom right, there is a "View in Search" link with a magnifying glass icon.

| Timestamp               | Log Line  |
|-------------------------|---|
| 2015-06-02 17:49:59,338 | [ServerIp] 10.0.0.135 [User] - [Action Type] START PROCESS [Action Description] start process |
| 2015-06-02 17:49:59,330 | [ServerIp] 10.0.0.135 [User] system [Action Type] CHANGE [Action Description] Index           |
| 2015-06-02 17:49:59,329 | [ServerIp] 10.0.0.135 [User] system [Action Type] CHANGE [Action Description] Index           |
