

Adding an Analytics Gadget

Displays log top problems and server problems detected by Analytics; gadget has a [View in Analytics](#) link that can be clicked to navigate to the Analytics Console to perform a drill-down.

To add an Analytics Gadget:

1. In **Title**, type a name for the gadget.
2. In **Time Range**, select the time frame following which the gadget display is to be refreshed.
3. Specify the **Data Sources** to be included in the Analytics view (server/folder/application/logs).
4. Click the **Save** button.

The gadget is saved in the dashboard.
